

*"Without free trade, I would have to shut down my  
**American plants** – and no one wins in that scenario."*

Loyd Ivey, Mitek Corp. Phoenix, Arizona

"Mitek is an American small business that epitomizes entrepreneurialism in America. Our consumer electronics products are made in the USA – in Wisconsin, Illinois, Missouri, Texas and Arizona. We do business with more than 50 countries, including Colombia.

I consider my employees my partners, because they share the pain when we can't export our products, and they share in the gain when we do. The only barriers we have to our success are limitations on international trade. The Colombia Free Trade Agreement represents significant gain to us. It would open a new market and level the playing field for our U.S. exports into Colombia.

Help me continue to build my American small business and the dreams of my employee partners. Pass the Colombia FTA."
